

\$CONFIO

The community token of Confío

Community Presale

Lo tuyo, tuyo.

No VC. No inflation. Built on trust.

THE PROBLEM

**You already know
the problem.
You live it.**

Banks that freeze. Currencies that melt.
Middlemen that take a cut of everything.

**Falta de confianza —
the tax Latin America pays every day.**

THE SOLUTION

Digital dollars no one can take from you.

cUSD

Dollars to spend & send — to a phone contact, in seconds

cUSD+

Dollars that grow — yield from US Treasuries, redeemable any day

Your keys

Not even Confío can freeze or move your wallet

Zero friction

Google/Apple sign-in. No seed phrases. No gas. Local payment methods in 7 countries

WHY NOW

The rails just changed.

Dollars moved on-chain

Last year stablecoins settled more volume than Visa and Mastercard combined.

Treasuries moved on-chain

Tokenized US Treasury products (like USDY) make real dollar yield possible inside a simple app.

Everyone noticed

Exchanges, fintechs, even MrBeast are building the same app. The category is proven — the winners will be decided by distribution and trust.

And Confío already has both.

SHIPPED, NOT PROMISED

This is not a roadmap. It's running.

2 mainnets

cUSD live on Algorand · cUSD+ vault
verified on BNB Chain

7 countries

Local rails: SPEI, PIX, Alias/CVU, QR,
PSE/Nequi + SEPA & cards

8,004 users

Phone-verified · 61.5% finish KYC

\$0 paid ads

Every user came from trust, not subsidies

100% open source — verify everything: github.com/caesar4321/Confio

THE FOUNDER

A Korean founder Latin America trusts.

5 years

living across Latin America — not a tourist, a neighbor

≈480,000

Spanish-speaking followers who watch him build every week

1 person

designed and shipped the entire stack — app, backend, contracts

\$0 VC

self-funded from day one. No fund owns this project

“Confío no se construyó con dinero — se construyó con confianza.”

THE MISSION

As big as the region itself.

US\$173.7B

sent home to Latin America in 2025 — a record, 16 years of growth

US\$38B+

in dollar deposits in Peru's banks alone, earning almost nothing

Millions

of families still outside the system, paying the trust tax daily

Confío's job: make the digital dollar normal — for all of them.

THE TOKEN

What \$CONFIO is.

1,000,000,000

Fixed supply. Forever. No inflation, no surprise minting.

Untouchable

Freeze and clawback permanently removed on Algorand — not even the issuer can touch your tokens. Lo tuyo, tuyo — applies to \$CONFIO too.

Community first

Governance, rewards, and membership in the Confío movement — held by the people building it.

Algorand ASA 3351104258 — verifiable on-chain

THE PRESALE

Five phases. One direction.

74,000,000 \$CONFIO — 7.4% of total supply — sold to the community in five phases.

Phase 1-1

\$0.20

Founding trust — the first believers

Phase 1-2

\$0.25

Early community

Phase 1-3

\$0.30

Closing the founding stage

Phase 2

\$0.50

Regional expansion — app fully live

Phase 3

\$1.00

Global liquidity → DEX listing

Earlier phase = lower price. All presale tokens unlock together at the official DEX listing, after Phase 3.

Rest of supply: founder reserve 89.36% (locked until listing, 36-mo vesting) · cultural fund 1.5% · co-builder 1% · rewards 0.74%. Full tokenomics: confio.lat

What \$CONFIO is not.

We sell trust. That only works if we tell you the whole truth.

Not backing

\$CONFIO does not back cUSD or cUSD+. Those are backed by USDC and USDY, separately and verifiably.

Not a promise of profit

No guaranteed returns, no promised price. Its value is your stake in a community and a mission.

Not liquid yet

Locked until Phase 3 ends and the official DEX listing. Buy only what you can hold.

Not finished

Long-term token utility will be formalized transparently before any listing.

Full terms, contracts, and code are public. Read before you join.

HOW TO JOIN

Three steps.

1

Download Confío

confio.lat — sign in with Google or Apple

2

Verify your identity

Two minutes. 61.5% of people who start, finish.

3

Join the presale

Inside the app — current phase and price shown live

Every purchase is on-chain and verifiable. Lo tuyo, tuyo — from day one.

**Money first.
Then records.
Then trust itself.**

Phase 1: the dollar layer — live today.

Phase 2: your economic history, owned by you.

Phase 3: agreements between strangers, guaranteed by code.

Lo tuyo, tuyo.
